PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building and shipping production web applications, with a backend focus across PHP and Node.js. Delivered an artist e-commerce marketplace and an internal sprint-management platform for a Hong Kong-based company, owning REST API design, relational and NoSQL schema design, and AWS deployment (EC2, S3) end to end. Comfortable across the stack with React, Next.js and Tailwind CSS, and experienced in taking features from requirement to release.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, Flutter

Backend: Node.js, Express.js, NestJS, PHP (Core PHP / OOP), REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD, Git, GitHub

Practices: API design, database schema design, Agile / sprint workflow, QA & regression testing

PROFESSIONAL EXPERIENCE

Backend Developer — 72 Dragons LLC

Mar 2024 – Jul 2026

Hong Kong (Remote)

- Owned backend development for two production products end to end — API design, database schema, business logic, and AWS deployment.
- 72 Dragons Art Website** — Built an e-commerce platform where artists showcase and sell their artwork. Developed Core PHP (OOP) REST APIs for artwork listings, artist profiles, uploads, orders and validation utilities, and integrated them with a React frontend.
- Sprint Management Tool** — Built an internal Node.js + Express + React tool to assign and track employee tasks, sprints and project progress, with automated email notifications for assignments, status changes and deadlines.
- Deployed and maintained both applications on AWS EC2, with Amazon S3 for artwork and media storage.
- Ran structured QA and regression testing across web and mobile views, logging and tracking defects through to closure with the product team.

Full Stack Developer Intern — Spark Foundation

Nov 2023 – Mar 2024

- Find Blood Donor Near Me** — Developed a MERN web application that helps patients and hospitals locate registered blood donors near their location.
- Implemented donor registration, blood-group and proximity based donor search, and REST APIs using Node.js, Express and MongoDB.
- Built the React frontend and deployed the application on AWS EC2 with S3 for image storage.

PROJECTS

TrustFolio (trustfolio.in)

- AI-powered shopping assistant (Flutter mobile app + MERN web app) that scrapes live listings from Amazon, Flipkart and Croma and recommends the best deal for the user's budget.
- Built Python scraping pipelines using the Scrapdo API for real-time price, rating and availability data, and integrated the OpenAI API to analyze listings and auto-rank the best cross-platform offer by price, rating and budget.
- Designed the Node.js/Express + MongoDB backend for product data and recommendations, with the automated scrape → analyze → recommend pipeline powering both the React web app and Flutter mobile app.

SellWhatUMade (sellwhatumade.com)

- Multi-vendor marketplace enabling home-based artisans and small makers to list, showcase and sell handmade products directly to customers.
- Built vendor onboarding, product catalog management, and order management, plus a customer-facing storefront for browsing and purchasing. (React / Node.js / MongoDB)

GoEventify (goeventify.com)

- Event vendor marketplace connecting customers with caterers, decorators, photographers and venues for event planning.
- Built vendor listings, search and filtering, and an enquiry-to-booking flow linking customers with vendors. (React / Node.js)

Gem Control

- Portable jewellery shop management system covering billing, inventory and customer records, packaged to run directly from a USB drive with no installation. (React / Node.js / MongoDB)

EDUCATION

B.Tech, Computer Science & Engineering — Shri Ram Institute of Science & Technology

2020 – 2024

Jabalpur, Madhya Pradesh • CGPA: 7.8 / 10
